AVIK MONDAL

Computer Science and Technology Engineer

✉ avik1152000@gmail.com +919874980900 Kolkata, India avikdevportfolio github

Professional Summary

Ambitious Computer Science graduate and **Full Stack** Web Developer specializing in the **MERN stack**. Proficient in building responsive applications with **HTML**, **CSS**, **JavaScript**, and **React**. Currently advancing expertise in modern front-end technologies with a focus on delivering scalable, user-centric web solutions. Passionate about continuous learning and contributing to innovative development projects.

Education

JIS School of Polytechnic Computer Science and Technology • 86%

Jul 2023 – May 2025

Studied core computer science fundamentals including C Programming, Java Language, Database Management Systems (DBMS), Data Structures and Algorithms, Computer Networks, and Artificial Intelligence (AI).

Professional Experience

Das Solution May 2026 – Present

Full Stack Developer Intern

As a Full Stack Development Intern, I developed and maintained responsive web applications using **HTML**, **CSS,** and **JavaScript**. I applied Advanced JavaScript concepts to optimize application performance and started building dynamic user interfaces with **React.js** and **Next.js**, completing practice projects to reinforce my development skills.

Euphoria GenX or Techno Exponent Pvt.ltd

Plot No. E2-4, Block-GP, Sector-V, Salt Lake City, Kolkata-700091, West Bengal

MERN Stack Developer Intern Jul 2024 – Sep 2024

Developed and deployed features for a web application using **React.js** and **Node.js**, improving app responsiveness and load time. Collaborated with a team to integrate **MongoDB** for data storage and managed API endpoints with **Express.js** while enhancing and implementing interactive React components.

Projects

Signup & LogIn

Built a foundational sign-up and login interface using HTML, CSS, and JavaScript, focusing on user authentication and interactive UI design. This project serves as a base for future enhancements in security and backend integration.

DevPulse

Developed **DevPulse**, a task manager web application built with **React** and **Vite**. Features a component-based structure and an interactive user interface designed to efficiently manage daily tasks, serving as a foundation for future enhancements in state management and backend integration.

Technical Skills

Frontend Technologies

JavaScript (Advanced), React.js, HTML, CSS, Bootstrap

Backend Technologies

Node.js basics

Database Technologies

MongoDB

Tools & Practices

VS Code, Git, GitHub
