Avik Mondal

Diesel Mechanic Engineer

avik1152000@gmail.com +919874980900 Kolkata, India Linkedin

Professional Summary

Dedicated engineering professional with hands-on technical expertise in both operational engineering and coal quality analysis. Proven track record in managing **Diesel Generator** plants, performing precise testing compliant with **ASTM** and **ISO** standards, and overseeing port logistics. Skilled in operational management, client reporting, and **Tug vessel maintenance**.

Education

Kalyani Govt. Industrial Training Institute Diesel Mechanical Engineering

Jan 2016 – Feb 2017

Highly skilled **Diesel Mechanical** and Marine Engineer with comprehensive training in the complete lifecycle of advanced internal combustion systems. Proven expertise in operating, maintaining, and troubleshooting a diverse range of diesel engines, including inline, **rotary**, and **marine** configurations. Deep understanding of **two-stroke and four-stroke operating cycles** with a strong focus on performance optimization and engine evolution. Committed to the highest standards of workplace safety and regulatory compliance.

Professional Experience

Deendayal Port Trust (Kandla Port Trust) Feb 2019 – Feb 2020

Diesel Mechanical Engineer

Engineered and maintained robust power solutions through the hands-on management of **Diesel Generator plants** and comprehensive troubleshooting during dockside ship repairs. Diagnosed, serviced, and overhauled critical diesel engines and **Tug vessel** machinery to ensure optimal maritime operations. Directed all essential port administrative functions, including financial reporting, payroll, and attendance tracking, while overseeing **weighbridge logistics** for accurate import and export transport processing.

KCS Inspection pvt. Ltd. Feb 2021 – May 2023

Assistant Chemist

Conducted rigorous **Coal quality analysis** adhering strictly to **ASTM** and **ISO** standards, evaluating key parameters including **Inherent Moisture**, **Volatile Matter**, and **Gross Calorific Value**. Managed joint laboratory testing initiatives in collaboration with **Welspun Private Limited** and **Adani**, ensuring precise operational data. Handled end-to-end office operations, including compiling technical reports and delivering professional presentations to client stakeholders.

Technical Skills

Diesel Engineer Apprenticeship

DG Generator Plant Management, Tug Vessel Handling, Diesel Engine Troubleshooting, Weighbridge Logistics Handling

Laboratory Chemical Analysis

Coal Quality Analysis, ASTM Standards, ISO Standards, Inherent Moisture Testing, Volatile Matter Testing, Gross Calorific Value, Sulfur Analysis
